Profile

Experienced financial modeller and data analyst in financial services, with an IT management background and hands-on experience building Excel, Python and C# models for budgeting, forecasting and regulatory change. Skilled in SQL, Azure, MySQL and Power BI, translating complex data into clear insights for stakeholders. Strong communicator with a track record of partnering with architects, developers and business teams to deliver client-driven SaaS solutions in fast-paced Agile environments.

Professional Experience

Jul 2023 – Present ***Financial Modelling Analyst at Intelliflo in Bath, United Kingdom*** *(full-time)*

- Designed and deployed **Claude AI** automation for team workflows, reduced manual development by **60%.**
- Implemented Git version control and standardised workflows across the team, reduced file retrieval time by **40%** and improved traceability of code changes.
- Designed and implemented a structured code audit and reconciliation framework with clear communication protocols, reduced reconciliation cycles by **50%.**
- Collaborated with business architects, clients, and developers to deliver client-driven system changes.
- Facilitated cross-team communication with Agile squads to ensure successful project delivery.
- Wrote excel and C# code to develop financial models and test engine code functionality.
- Designed Confluence pages with feature requirements, ensured compliance with UK and Australian regulations.
